

pony bead
INDIAN CORN

To make an ear of Indian corn, you just need four same color pipe cleaners and pony beads in fall colors.

Take two of your pipe cleaners and make an "X". Twist them around each other in the middle, do this again with your other 2 pipe cleaners.

String the beads on each pipe cleaner (8 ends).

Leave a couple inches at the end of each pipe cleaner.

Bring all the ends together.

Take one of the pipe ends and wrap it around the others.

Wrap another piece of pipe cleaner around the stem if it's not secure enough, and you are done!
